KEY WORDS

Guarantor district, interior tourism, foreign tourism, recreation, environmental tourism, tourist base, infrastructure, investment, sustainable development, national nature garden, sanatorium, mountain tourism.

INTRODUCTION

Guarantor district Uzbekistan central in part, Jizzakh of the province southeast in the territory located to be, to be oneself unique natural conditions with separated The area is mainly Turkestan of the ridge northern on the slopes located to be high mountains, fir trees forests, meadows gorges and pure to the springs is rich. This is the area not only ecological, maybe health promotion tourism also convenient for to the place turns.

Zamin's natural climate temperate -continental be, write in the months cool, in winter and relatively soft Especially in the mountains and forests. in the regions clean and wet air breath roads diseases in treatment effective In this respect, the area is remote. from years since recreational place as famous

The area main tourist from objects one — Zamin national nature garden This is The garden was established in the

1970s. done to be, Uzbekistan in the area the most ancient guarded natural from the regions In the garden area hundreds plant and animal types there is to be, their some are listed in the "Red Book" This is included. ecological tourism, scientific expeditions and photo tourism for wide opportunities creates.

Guarantor – internal tourism center as

Last in years in our country internal tourism develop state of the policy priority in the direction of became. Zamin district this in process as an important area is being formed. The population's recreation culture exceed going, family and health promotion increasing demand for tourism To the rescue was interest strengthened.

In the area located Guarantor sanatorium internal tourism in development important place Sanatorium on the

mountainside, by the sea from the surface much at altitude located to be, heart and blood vein, nerve system and breath roads diseases to treat specialized. Here year during thousands citizens health promotion from services uses.

Internal tourism in development family vacation places, summer children campsites, mountain sports routes, hiking and bicycle routes organization This is being done. of the area tourist base strengthening, services type is expanding.

External tourism potential and prospects

Guarantor district not only internal, maybe external tourism develop too big for to opportunities has. Foreign tourists, especially ecological clean and less learned to the regions interest Zamin 's mountainous landscapes, junipers forests and traditional village life experience foreign tourists for attractive is considered.

External tourism develop for following factors important:

Modern hotel and hostels network expansion;

International to standards suitable service services on the road to put ;

Transportation and road infrastructure improve;

Digital marketing and international at exhibitions active participation to be

Guarantor territory international on a scale promote to do through him/her Ecological problems in Central Asia tourism from the centers to one convert possible.

Tourist base and infrastructure issues

Tourist base is in the area tourism develop for necessary was material and technical, social and natural resources set is considered a surety. in the district tourist base following structural from parts consists of:

Natural resources (mountains, forests, climate, water sources);

Recreational facilities (sanatorium, recreation) places);

Transport infrastructure;

Hotel and general food networks;

Cultural and ethnographic objects.

In the area new hotels, family guest houses and eco-cottages construction tourist potential is increasing. With this together, infrastructure stable ecological principles based on

development important.

Stable development and ecological balance

Tourism intense develop in the process natural the environment protection to do issue current importance profession Especially, Zamin national nature garden in the territory ecological download standardization necessary. Tourist the flow order waste, waste management and ecological culture increase through stable to develop achieve possible

Ecotourism principles current to grow, local the population tourism to the services attraction to do and green economy from mechanisms development of the use area main from directions one to be necessary.

Economic efficiency and social importance

Guarantor in the district tourism develop new work places creation, population their income increase and regional infrastructure to improve service Tourism industry: transport, trade, crafts and service show also develops networks.

Local population by national food, crafts items and ecological clean village farm products offer to grow external tourism development positive impact shows. This and of the area economic stability in providing important factor is considered.

CONCLUSION

Guarantor district his/her own unique natural resources, health places and comfortable geographical location with In Uzbekistan internal and external tourism in development important tourist base as manifestation is happening. Zamin national nature garden and Guarantor sanatorium such as objects of the area recreational potential by designating gives. Modern infrastructure, environmental stability and investment environment improve through Guarantor the district international tourism in the market competitive to the area convert possible.
